About the Author

François Garillot worked on Scala's type system in 2006, earned his PhD from the French École Polytechnique in 2011, and worked at Typesafe, after a brief stint in Internet advertising. He's worked on interactive interfaces to the Scala compiler, while nourishing a strong enthusiasm for data analytics in his spare time, until Apache Spark let him fulfill this passion as his main job. He received the first Spark Certification in November 2014, and worked in London and Philadelphia, among other places.

In his spare time, he can be found practicing one of a half-dozen ways of making coffee, climbing up or skiing down a not-necessarily-Alpine mountain, or sailing a not-necessarily coastal course.

Gerard Maas is the lead engineer at Kensu.io, an early stage startup where he works on context management for big-data environments. Previous to that, he led the design and development of the data processing pipeline of Virdata.com, a startup building a cloud-native IoT platform, where Scala, Apache Spark and Spark Streaming were crucial building blocks. He enjoys contributing to open source projects, small and large.

Through his career in technology companies like Alcatel-Lucent, Bell Labs, Sony and Technicolor, he has been mostly involved in the interaction of services and devices, from early days service adaptation when mobile screens only had few text lines, passing through multi-device interactions to IoT device management.

He has a degree in Computer Engineering from the Simón Bolívar University, Venezuela.
