TAX, LIES AND RED TAPE: CONFESSIONS OF AN UNRECONSTRUCTED NEOLIBERAL FUNDAMENTALIST BY DAWIE ROODT, LINETTE RETIEF PDF

Find out why:

- It's wrong to blame Wall Street bankers for the global financial crisis.
- The rhino-horn trade should be legalised.
- Exempting anything from VAT is a bad idea, even for the poor.
- Job creation is a fruitless exercise.
- South Africa's problem is not poverty.

Tax, Lies and Red Tape is an insightful, easy-to-understand, very opinionated book about economics by one of South Africa's most experienced and controversial economists. Dawie Roodt argues that economics is not about numbers, graphs and statistics; it is about people, and about how they react to incentives. Unfortunately, our politicians seem to have forgotten this.

Using simple concepts and thought-provoking anecdotes, the book explains how 'the market' evolved with humanity, what was wrong with communism, what the global financial crisis is really about, the ways in which the state spends your money (and the ways in which it actually should), how tax is collected, how money and inflation really work, the ins and outs of trade, and the ups and downs of labour.

In the process, Roodt debunks politically correct thinking and current government policy, and suggests alternatives for a more effective system. Whether you agree with him or not, Tax, Lies and Red Tape will get you thinking about economics in a completely new way.

Who knew economics was interesting ?

By Liquid G

I never thought I would enjoy reading something about a dry old boring topic like economics. But I am! I am also understanding things I gave up on. An informative and entertaining read that gets you thinking and asks some questions that really, really need to be asked.

1 of 1 people found the following review helpful.

a must read for every South African taxpayer...and politician

By adriaang

This book gives a lot of insight into the South African economy and how taxpayers money are spent, how they are over taxed and how the whole system can be improved. Every taxpayer in South Africa supports 9 people who don't pay tax, and new taxes like etolls seem to be invented yearly.

Dawie explains the basics of an economy so anyone can understand ... even politicians. He compares the South African economy with other countries and illustrates how a simpler tax system can also be more effective. A brilliant book, read it!

Finally!

By Gary Gurnell

After 58 years of believing I was an obnoxious, angry white man it's just dawned on me...I'm a libertarian!

Danie Roodt has put a grin on my face that may never completely disappear!

Sir, you have just qualified to wear your underpants over your clothes, with a suitable towel tied around your neck.

Thank you for a wonderful read. We'll done.
