Review

"LeGates and Stout have crafted an introductory text aimed at "students who will encounter many of the writers and writings for the first time" (page 3). They introduce the field in a prologue entitled "How to Study Cities" that offers guidance on where to find courses on cities within universities, on the differing views students will encounter across disciplines, on the utility of theory versus applied research and practical knowledge, on the varied methods used to study cities, and on the field's key organizations and journals. The authors guide the reader through the volume by offering introductory essays for each major section and short introductions to each selection. The section introductions raise larger questions students need to bear in mind, and also link current discussions to historical issues. Together these introductions act as a sort of connective tissue for the volume as a whole, pointing out recurrent themes and helping us to see current problems in historical context." - Elizabeth J. Mueller, University of Texas at Austin

THE CITY READER, 5TH EDITION (THE ROUTLEDGE URBAN READER SERIES) FROM ROUTLEDGE PDF

The fifth edition of the highly successful City Reader juxtaposes the best classic and contemporary writings on the city. It contains fifty-seven selections including seventeen new contributions by experts including Elijah Anderson, Robert Bruegmann, Michael Dear, Jan Gehl, Harvey Molotch, Clarence Perry, Daphne Spain, Nigel Taylor, Samuel Bass Warner, and others – some of which have been newly written exclusively for The City Reader. Classic writings from Ebenezer Howard, Ernest W. Burgess, LeCorbusier, Lewis Mumford, Jane Jacobs and Louis Wirth, meet the best contemporary writings of Sir Peter Hall, Manuel Castells, David Harvey, Kenneth Jackson.

This edition of The City Reader has been extensively updated and expanded to reflect the latest thinking in each of the disciplinary areas included and in topical areas such as sustainable urban development, climate change, globalization, and the impact of technology on cities. The plate sections have been extensively revised and expanded and a new plate section on global cities has been added.

The anthology features general and section introductions and introductions to the selected articles. New to the fifth edition is a bibliography listing over 100 of the top books for those studying Cities.

Terrible for a classroom setting.

By J. O'Hara

Horrible if you're using this for a classroom environment, one of the worst ebooks I've had the misfortune of using.

The short list of problems with this edition:

- The table of contents only lists parts and not individual papers
- The page numbers are completely out of sync with the physical version of the fifth edition
- For whatever reason trying to find individual readings and papers with the search function is fruitless
- The editor's introduction of each reading is not separated from the reading itself by any change in font or even a space. It just flips from the editor's introduction to the reading itself without any indication and you have to look for clues to see where, like citations that are after the publication of the reading itself.

This is on top of all of the traditional hurdles you have to overcome when using a kindle version of a textbook (which I'm used to.) If you're getting for a class, just save yourself some trouble and grab the physical edition.

better off buying a used version

By Amazon Customer

I would not rent this book on Kindle. The Table of Contents is unavailable. It is hard to find chapters and selections without it? Essential to a reader when you have to read the book in a non-linear manner. The page numbers do not coincide with printed edition thus it cannot be used for citing for academic writing. Also there is a clear distinction of the editor writing on the text and article chosen for each section. In the printed text there is a clear distinction between in fonts to show this differentiation. This is poorly laid for rental purposes. Stay away from renting this book for the classroom. better off buying a used version!
