Resource, not a read

By Bookworm64

This is NOT a book you read straight through. It's handy for looking up any fight's numbers in order to wargame, especially if you use miniatures, or really are doing a study on the Napoleonic Wars with the Revolutionary Wars tossed in. Essentially, you get this book, The Military History and Atlas of the Napoleonic Wars by Elting, a book on how (like Featherstone's) and you can wargame pretty much any size engagement, while learning how all the little fights can bleed one as dry as a big one. It is certainly revealing just how much fighting, and casualties, actually gets ignored in writing history of campaigns, and this book shows it.

Great for Napoleon War Buffs

By Barbara D. Zambrana

There is some very detailed data in "The Greenhill Napoleonic Wars Data Book:Actions and Losses in Personnel" for buffs who like to keep track of who won what battle. I received it in good time and condition and I got it for a good price. I am very satisfied - Thank You

Wait for the (never to be published) Revision

By Loving Life More

I REALLY wanted to like this book. I use it ONLY for its LIST of battles and nothing more. Here is why:

1. As Mr. Kiley points out in his review the information is often incorrect. You would think that the author

would have compared his information with other sources. I get the idea that he was just looking for whatever he could find on the action and just posted it into the listing.

2. The names of the actions do not always match the name that most historians use. No, this is not a case of "Sharpsburg" vs. "Antietam." This is a case of the author again just using whatever name came to hand.

3. The author himself is not open to suggestion. In a comment on a Napoleonic forum I noted that I used "Mr. Smith's information" to which he responded that it wasn't his information but the sources. That is the usual cheap excuse/cop out of an author to sidestep the obvious - we paid our hard earned money for HIS work. The entries are based on what HE felt was best for the action. You can find ten sources for most any given Napoleonic engagement. And often more than that. So HE chose to put that entry in there and thus it becomes HIS perspective of it as well as that of the source. Come on Digby - wake up and quit making excuses.

4. To my comments he said "grind away." No, I will just not buy your books anymore. Your Leipzig book was just filled with one page after another of quotes that filled entire sections of the text. Instead of giving us more information on the battle you filled your pages with comments about how a priest escaped the rain! Now I like a human interest story but come on. The Battle of Leipzig is rarely written on and is the largest land battle in European history up til World War One. It deserved better treatment.

5. When I asked the author if a revision would be forthcoming his response was that Greenhill would not republish the work. This leads me to believe that Greenhill has little to no confidence in Mr. Smith's works. Also when I asked him if he would then consider using the web to publish an errata for the work he said no. Sheesh, that is just lame.

Lots of well known historian's names are used in the beginning of this book to prop it up but I am thinking that if ANY of them had written the work they would have put forth a superior product. I really want to give this book a five out of five stars but I cannot. It simply is not worth your money unless you just want it for the list of battles or a boat anchor.
