Fascinating book!

By M. P. Montgomery

To see a straight science guy, highly accomplished in his field, delve into metaphysics to answer the eternal questions of humanity is sooo unusual. So few have the cojones to do something like this. Most feel like a move like this would kill their career and reputation. I'm only a quarter of the way through this book, and absolutely love it. I have studied sacred geometry, and Ernst bases his quest on the geometry of the human eye. I'll just say that this study led him on an astounding journey of discovery.

Ernst writes in a straightforward manner, easily understood in an unobstructed flow of action and idea. I recommend this enthusiastically for all ages. It is very mentally stimulating and satisfying.

Good book. What I found weak was the amount and type of references used. The author mirror his conclusions on mainly two references: Blavatsky, Roerich and Lobsang Rampa. Even though I like these authors, the community has some strong opinions about them. This puts his book in the same place as those. If his thesis is true, his experience searching for the meaning of was revealing.

Interesting story

By Amazon Customer

The mid section, the data gathering in Tibet, was highly interesting. What if it is true? The last one-fifth of the book, the authors conclusions, does not seem to rest on solid ground
