The book of all books about motivation

By Carib Reader

I bought this book years ago while on the search for something very different. But because I couldn't find that other book, I took this one. Wow... and I have to say, it has changed my life!!! If you are looking for a down-to-earth, easy-to-read book, this is the one. Paul has a way to show you the way in your life, that is so unique. He speaks to you like a friend would speak to you. Not that scientific, technical terms english, but basic, easy to understand and motivational. The titel says it all. If you want to know how to succeed in life... read this: **YOU CAN DO IT!!** And you will be able to do it. You should also read the second book he wrote called: *Believe and Achieve*. It is just as good as this one. You want a book that helps you change your life - this is the one!!!!

Very good book for young adults

By Willie Peck

Many years ago, I came across this book as a young adult. S\$25 was not cheap for a student like myself then. I hang around in the book store for almost an hour reading it, before I decided to invest my whole week of allowance into it. Two decades down the road, looking back, this was probably one of the best 'investment' I made in my younger days. It changes my life dramatically, for the better. Only wish is to have it as a kindle copy so that I can easily refer to it every once in a while, to remind myself of certain things in life.
